

October 28, 2021

Dear Residents and Loved Ones of Good Samaritan Vista Village,

Further to the letter sent to you on October 19, I wanted to provide you with an update regarding the outbreak at Good Samaritan Vista Village. We have not identified any additional cases of COVID-19 and all previous active cases have recovered. While this is great news, our employees remain diligent and are following all safety precautions currently in place.

Although COVID-19 cases in the community are trending in the right direction, we have seen an increase in cases of unknown exposure. As a result, it is important that you are following public health restrictions and guidance out in the community to protect not only yourself but our residents from exposure. This includes continuous masking within our care home when you are visiting. If you are unsure of the restrictions currently in place in your community please visit the Government of Alberta website at this link <https://www.alberta.ca/coronavirus-info-for-albertans.aspx>.

If you have any questions or concerns, please contact Logan McInnes, Manager, Site and Clinical Services at (403) 627-1900.

We appreciate your continued support as we progress through this outbreak.

Sincerely,

Candice Christenson
Vice President and Chief Clinical Officer
